

Certified Phlebotomy Technician Program- Fact Sheet

Program Goal

The goal of this program is to train students to safely draw blood from patients for medical purposes in a healthcare facility.

Program Description

This program includes classroom instruction, laboratory work and hands-on practice that prepares the student to be a competent phlebotomist. The course provides the student with the skills to interact with the patient and the skills to safely and efficiently collect, label, prepare and store blood for analysis.

Program Duration: 5 weeks

Program Eligibility: Must be at least 18 years old, have a high school diploma or GED.

Program Fees: \$1,995 with a payment plan available upon request. This cost includes books, certification testing, CPR training, OSHA training, laboratory and other supplies.

Program Certifications

Those who successfully complete this program are eligible to take the certification exam to be certified by the National Health Association (NHA) as a Certified Phlebotomist Technician.

Program Flexibility

To accommodate work and family schedules, we have flexible day, evening and weekend program schedules.

Employment opportunities

Graduates from this high demand program may find employment with healthcare facilities such as hospitals, clinics, medical offices, emergency rooms, long-term care facilities and more.
